

SRO TECHNOLOGY

Solutions in Measurement

CAPABILITY STATEMENT

SRO Technology's Approach

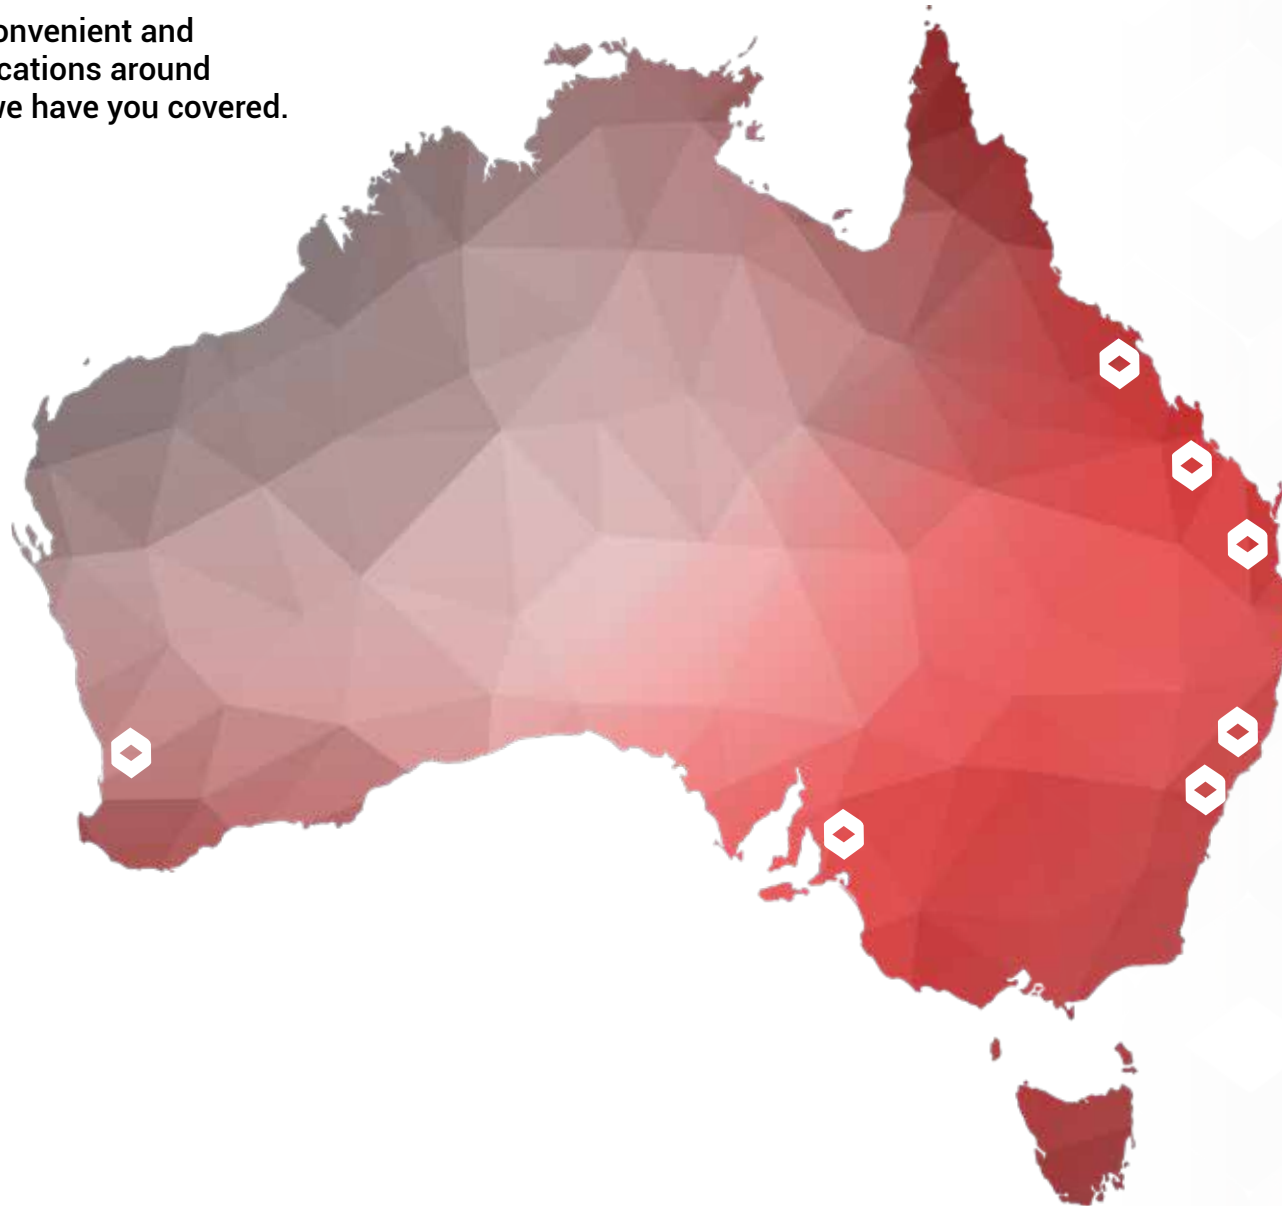

Our customers make better decisions because we ensure the reliability and accuracy of their measurement instruments

- Our team is focused on getting your instruments reading accurately, not selling you products you don't need.
- We place a high value on building long term partnerships with our customers.
- We focus on simplification and standardisation of equipment, resulting in simpler inventory and lower operating expenses for our customers.
- We hold stock of critical spares, meaning less downtime for you.
- With our industry partners we have access to a range of the best brands and products in the industry.

Locations and Service Areas

With our convenient and growing locations around Australia we have you covered.

Our services are available throughout Australia and the entire Asia Pacific region.

We have service centres in:

- Brisbane
- Mackay
- Newcastle
- Sydney
- Perth
- Rockhampton
- Adelaide

Our Team

Dedicated and committed professionals striving to deliver the best in measurement solutions.

- With our specialist team we will ensure your equipment is calibrated and reading accurately giving you confidence in your site data.
- Our team includes specialist technicians with National Measurement Institute licenses, as well as certified Radiation Safety Officers.
- We leverage our 30+ years of industry experience to ensure every new member in our team grows into a highly capable, qualified technician, to provide the quality service our clients expect.
- We believe in investing in our people, providing training, support and development throughout their career whilst maintaining a company culture that fosters retention.

Weighing Solutions

Specify, Design, Manufacture, Install, Maintain and Support

With our precision belt scales and products designed and developed by our in-house engineers and manufactured here in Australia, we have a quality solution for all your production and accounting needs.

We specialise in a range of bulk material instruments with our core capabilities being in: dynamic belt weighers, tramp metal detectors, gravimetric bin level systems and nucleonic density gauges.

The benefits of using SRO for your turn-key projects extend beyond the initial installation and commissioning of equipment with local spares and support being a phone call away.

Key Benefits:

- We only supply globally recognised and respected equipment, or we build it ourselves!
- Local stock, rationalised and streamlined spares.
- Full technical support during the design process, ensures the correct specification is determined from the beginning.
- A highly experienced service team ensures trouble-free installation and calibration of all equipment.
- Proven results across multiple industries.

Process Instrumentation Solutions

Specify, Supply, Install, Maintain and support

SRO have experienced Instrumentation Technicians available to service all your process instrumentation needs:

Our Instrumentation services include:

- Installations and Commissioning activities
- Plant audits
- Routine maintenance
- Breakdowns/ troubleshooting and repairs
- Hazardous area installations, inspections, and quality assurance
- Control panel manufacturing
- Electrical control systems under 1000V AC
- Standardisation and critical spares projects

Process Instruments we cover:

- Pressure
- Temperature
- Flow
- Conductivity, Turbidity and PH
- Pneumatic Equipment
- Distance
- Gas detection
- Fire detection
- Oxygen Sensors
- Density
- Valves
- Level
- Transport
- Waste Management
- Warehousing and distribution

Industrial Weighing Solutions

Services provided by SRO Technology

- Weighbridge Verification according to NMI standards.
- Preventive Maintenance on all weighing equipment .
- Weighbridge load cell upgrade to digital load cells.
- Small scale and balance calibrations and verification.
- Batching Plant Calibrations.
- All weighing equipment repairs.
- Reg13 of weights
- Belt weigher verification and new installations

Products supplied by SRO Technology

- Australian Made Composite Weighbridges.
- Modular Steel Deck and Portable Weighbridges.
- Large Stainless Steel Outdoor Remote display.
- Platform scales and bench scales.
- Laboratory balances and Moisture Analysers.
- On-Board Weighing Equipment.

Industries we support

The Service provider for all your Instrumentation & Weighing equipment requirements within the following Industries:

OIL & GAS

MINING & RESOURCES

This includes coal, iron ore, precious metals, quarries and more.

WATER TREATMENT

AGRICULTURE

This includes grain, meat packing, sugarcane and more.

MANUFACTURING

This includes food and beverage, pharmaceutical and Australian made product manufacturing industries.

Valued Clients

Our aim is to support our clients with reliable, high quality, responsive service to enable optimisation of physical assets through the below industry sectors.

"Industry for 35 years, I can in all honesty say that our experience since engaging SRO Technology Pty Ltd, has been exceptional and has been extremely beneficial in growing our Company. Time

critical and general communication from all within the office and at a technical level has been outstanding with multiple channels of feedback sort on any particular problem which shows a

customer commitment to utilise their knowledge base in order to achieve a satisfactory outcome for not only resellers such as ourselves but also the end user (customer)."

Glenda & Peter – Instrogp

"SRO's customer service is excellent whilst on site at Cadia Valley Operations, their technicians are both knowledgeable and eager to help improve plant availability. Their work is always completed in the allocated time frames.

They consistently adhere to all safety standards and procedures and have an amazing work ethic, often going above and beyond what is expected of them. It is for this reason I rank their service as excellent.

Any issues found during weigher servicing are raised and resolved, reports are always sent in a timely manner after each shut down is complete. The level of professionalism demonstrated is second to none."

Jeremy Kelly – Newcrest Mining

HUNTER VALLEY OPERATIONS

"SRO are great to deal with, SRO are always happy to help in any way possible. Never an issue with SRO products, the technicians that come to site are all proficient in their area of expertise. SRO is extremely professional."

Jesse Fowler – Hunter Valley Operations

"Centennial have always found the SRO team professional in their approach and attentive to their customer needs. We have enjoyed a long relationship with SRO and look forward to many more years working together to achieve our collective business goals."

Rodney Boland – Centennial
